**DETAILED ACTION**

1. This action is responsive to the amendments filed January 26, 2009. In the instant amendment, claims 1 have been amended; and claims 20-31 have been added.
2. Claims 1-5, 7, and 20-31 have been examined, and all remained pending claims are allowed (renumbered 1-18).

**Examiner's Amendments**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
4. Authorization for this examiner's amendment was given in a telephone interview with Mr. Glanzman, Registration No. 25,035, on May 6, 2009 to obviate any 35 USC section 112 issue and put the case in condition for allowance.

**IN THE CLAIMS:**

Claims 1, 20, and 26 are amended as follows:

**Claim 1 (Currently Amended),**

Line 23, after "installing the new software module", insert , which has been tested and is compatible with the existing set of software modules.

**Claim 20 (Currently Amended),**

Line 29, after "installing the new software module", insert , which has been tested and is compatible with the existing set of software modules.

**Claim 26 (Currently Amended),**

Line 25, after "installing the new software module", insert , which has been tested and is compatible with the existing set of software modules.

**Examiner's Statement of Reasons for Allowance**

5. As Applicants pointed out in the Remarks, the prior art of record (Sprecher and Dougherty) do not disclose and/or fairly suggest at least claimed limitations recited in independent claim 1 "*...responsive to a determination to test the new software module in the test data processing system in combination with the existing set of software modules, identifying an operating environment of the data processing system; installing the new software module, the identified environment, and the existing set of software modules on the test data processing system; testing the new software module in combination with the existing set of software modules on the test data processing system; responsive to a test result indicating that the new software module is compatible with the existing set of software modules, adding a new combination indicating the compatibility to the knowledge base*" and similarly recited in such manners in other independent claims 20 and 26 (Remarks, pp. 10-17).

These claimed limitations are not present in the prior art of record and would not have been obvious, thus all pending claims 1-5, 7, and 20-31 are allowed.
